

Test document

author

date

Here I have a citation [BookAuthor \(2025\)](#). Hyperlink works fine

Here I have another citation [PaperAuthor1, PaperAuthor2, and PaperAuthor3 \(2025\)](#).

All good so far. In this line, I have a bit of filler text before I cite the paper again [PaperAuthor1, PaperAuthor2, and PaperAuthor3 \(2025\)](#). Suddenly, if you tried to hover your mouse over these hyperlinks, they don't work anymore. The hyperlink is not over the green text and is strangely in the middle of the sentence over non-highlighted words (in this case, it's the words "have a bit ... again". I face this issue whenever the citation wraps around a line.

Bibliography and References

BookAuthor. *Book Title*. Publisher, 2025.

PaperAuthor1, PaperAuthor2, and PaperAuthor3. Paper title. *Journal*, 2025.
